GOVERNMENT DOMAIN SECURITY REPORT

# gettysburgma.com

Gettysburg Municipal (Water and Sewer) Authority, Pennsylvania

Checked November 18, 2026 at 10:43 PM UTC · Check ID 1b659bfd-a267-44a7-a900-ffd0b07e91ed

**D+**

**6** of 16 checks passed **Residents are exposed**

Basic protections recommended by CISA are missing. Each fix below is a standard setting, listed in order of risk to residents.

6 passed · 1 needs attention · 9 missing

| Website | Email | DNS and domain |
|---|---|---|
| 5 of 8 | 0 of 5 | 1 of 3 |

### Not on a .gov domain

gettysburgma.com is not a .gov address. Anyone can register a look-alike .com or .org, so residents cannot tell from the address alone that this is the official site.

**CISA and DHS advise that .gov is a requirement for secure government, trusted communication and public trust. Every day on a non-.gov address is a day residents can be fooled by an impostor site or email.**

## What to fix first

In order of risk to residents. Each is a one-time setting that then needs to be watched.

1. **Add a DMARC policy** — HIGH RISK
   Nothing tells receiving servers to reject mail that falsely uses this domain, so fake bills and payment requests in the agency's name are delivered.
   **Fixed by: Your email or DNS provider**

2. **Repair the SPF record** — HIGH RISK
   Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.
   **Fixed by: Your email or DNS provider**

3. **Turn on DKIM signing** — HIGH RISK
   Outgoing mail is not signed, so receivers cannot confirm it came from the agency, and DMARC cannot be fully enforced.
   **Fixed by: Your email provider**

4 **Turn on DNSSEC** — HIGH RISK
DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.
**Fixed by: Your DNS host and domain registrar**

5 **Turn on HSTS** — MEDIUM
On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
**Fixed by: Your web host**

6 **Require encrypted mail delivery (MTA-STS)** — MEDIUM
Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.
**Fixed by: Your email or DNS provider**

7 **Turn on mail encryption reports (TLS-RPT)** — MEDIUM
Nobody is told when encrypted mail delivery to the agency fails or is tampered with.
**Fixed by: Your DNS provider**

8 **Add a CAA record** — MEDIUM
Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.
**Fixed by: Your DNS provider**

9 **Publish a security contact (security.txt)** — MEDIUM
People who find a security problem have no standard way to tell the agency before it is misused.
**Fixed by: Your web host**

10 **Add IPv6 support** — MEDIUM
Networks that only use IPv6, including some mobile carriers, cannot reach the site directly.
**Fixed by: Your web host**

# All results in detail

Every record and value we saw, grouped by area. Written for your IT team, readable by anyone.

## Website — 5 of 8 passed

### HTTPS certificate — PASS

| | |
|---|---|
| Issued by | **YR1** |
| Issued to | **www.gettysburgma.com** |
| Expires | **February 11, 2027 (84 days after this check)** |
| TLS version | **TLSv1.2** |

### Redirect to HTTPS — PASS

| | |
|---|---|
| HTTPS available | **Yes** |
| Plain address redirects to HTTPS | **Yes** |

### HSTS — MISSING

| | |
|---|---|
| HSTS header | Not sent |

**What this means:** On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.

**How to fix:** Send the Strict-Transport-Security header with a max-age of at least one year. (Your web host)

### Certificate trust and match — PASS

| | |
|---|---|
| Trusted chain | Yes |
| Strong public key | Yes |
| Valid signature | Yes |
| Name matches domain | Yes |

### CAA record — MISSING

| | |
|---|---|
| CAA record | Not found |

**What this means:** Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.

**How to fix:** Publish a CAA record naming the authority you use, for example 0 issue "letsencrypt.org". (Your DNS provider)

### Framing protection — PASS

| | |
|---|---|
| X-Frame-Options | SAMEORIGIN |

### File type protection — PASS

| | |
|---|---|
| X-Content-Type-Options | nosniff |

### Security contact (security.txt) — MISSING

| | |
|---|---|
| /.well-known/security.txt | Not found |

**What this means:** People who find a security problem have no standard way to tell the agency before it is misused.

**How to fix:** Publish /.well-known/security.txt with a contact address and an expiry date. (Your web host)

## Email — 0 of 5 passed

### SPF — NEEDS ATTENTION

| | |
|---|---|
| Record | `v=spf1 mx include:spf.protection.outlook.com ip4:50.205.12.15 ~all` |
| Ending | Soft fail (~all) |

**What this means:** Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.

**How to fix:** Publish one TXT record that lists every service sending mail for the domain and ends in -all. (Your email or DNS provider)

### DKIM — MISSING

| | |
|---|---|
| Signing keys | Not found |

**What this means:** Outgoing mail is not signed, so receivers cannot confirm it came from the agency, and DMARC cannot be fully enforced.

**How to fix:** Turn on DKIM in the mail service (Microsoft 365, Google Workspace and others) and publish the DNS records it gives you. (Your email provider)

### DMARC — MISSING

| | |
|---|---|
| DMARC record | Not found |

**What this means:** Nothing tells receiving servers to reject mail that falsely uses this domain, so fake bills and payment requests in the agency's name are delivered.

**How to fix:** Publish a TXT record at _dmarc with p=quarantine or p=reject and an address to receive reports. (Your email or DNS provider)

### MTA-STS — MISSING

| | |
|---|---|
| DNS record | Not found |
| Policy file | Not found |
| Enforced | No |

**What this means:** Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.

**How to fix:** Publish an _mta-sts TXT record and a policy file at mta-sts.(domain)/.well-known/mta-sts.txt. (Your email or DNS provider)

### TLS-RPT — MISSING

| | |
|---|---|
| TLS-RPT record | Not found |

**What this means:** Nobody is told when encrypted mail delivery to the agency fails or is tampered with.

**How to fix:** Publish a TXT record at _smtp._tls with an address to receive reports. (Your DNS provider)

## DNS and domain — 1 of 3 passed

### DNSSEC — MISSING

| | |
|---|---|
| Zone signed | No |
| Result | No DNSSEC records found. DNSSEC may not be enabled for this domain. |

**What this means:** DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.

**How to fix:** Turn on DNSSEC signing at the DNS host, then add the DS record at the registrar. (Your DNS host and domain registrar)

### IPv6 — MISSING

| | |
|---|---|
| Website reachable over IPv6 | No |
| Name servers reachable over IPv6 | Yes |

**What this means:** Networks that only use IPv6, including some mobile carriers, cannot reach the site directly.

**How to fix:** Ask the host for an IPv6 address and publish an AAAA record for the site. (Your web host)

### RPKI route protection — PASS

| | |
|---|---|
| Website route signed | Yes |
| Website route valid | Yes |
| Name server route valid | Yes |

### .gov domain

NOT SCORED

Ends in .gov — No

**What this means:** Anyone can register a look-alike .com or .org, so residents have no way to confirm this is the official site. Every .gov request is verified by CISA.

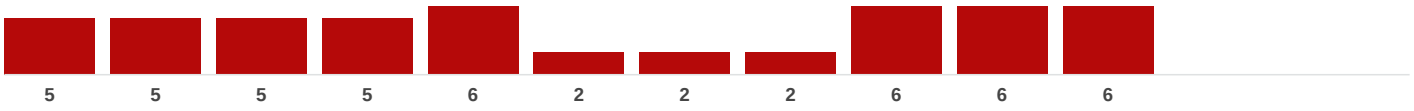

### Hosting and platform

Informational, not scored

| | |
|---|---|
| Website server | **208.90.190.43** |
| Mail server | **gettysburgma-com.mail.protection.outlook.com** |
| Website server reputation | **Not on abuse lists** |
| Mail server blocklists | **Not listed** |
| WordPress | **Not detected** |
| Email addresses published on the site | **0** |
| Broken links found | **0** |
| Referrer policy header | **strict-origin-when-cross-origin** |

## Progress over time

Checks passed at each scan, oldest to newest. Highest possible is 16.

### If these basics were missed, what else has been missed?

These are published CISA standards that any IT department or provider can check in seconds. YesGov can fix all 10 in under 24 hours, re-run this check to prove it, and keep watching every day. The move to .gov takes 1 to 2 weeks because CISA verifies each request; security fixes on the current domain do not wait for it.

**yesgov.com/contact · (888) 777-0017 · info@yesgov.com**

## How we check

We only check settings that any computer on the internet can see: DNS records, certificates, web headers and mail policies. We never log in to, scan or probe any agency system. The 16 checks build on CISA Binding Operational Directive 18-01 and other published internet standards. Full method: yesgov.com/open-data#how-we-grade.

### Verify this report online

Scan the code or visit the address below to see these results, check the domain again and get alerts when anything changes.
