GOVERNMENT DOMAIN SECURITY REPORT

# iukams.com

City of Iuka, Mississippi · Population 3,077

Checked October 20, 2026 at 7:51 PM UTC · Check ID d3c40bca-336e-4526-9ff2-72b9deae3e02

C

**8** of 16 checks passed **Residents are exposed**

Basic protections recommended by CISA are missing. Each fix below is a standard setting, listed in order of risk to residents.

8 passed · 1 needs attention · 7 missing

| Website | Email | DNS and domain |
|---|---|---|
| 4 of 8 | 2 of 5 | 2 of 3 |

### Not on a .gov domain

iukams.com is not a .gov address. Anyone can register a look-alike .com or .org, so residents cannot tell from the address alone that this is the official site.

**CISA and DHS advise that .gov is a requirement for secure government, trusted communication and public trust. Every day on a non-.gov address is a day residents can be fooled by an impostor site or email.**

## What to fix first

In order of risk to residents. Each is a one-time setting that then needs to be watched.

1. **Send every visitor to HTTPS** — HIGH RISK
   Residents who type the plain address or follow an old link get an unencrypted page that can be read or changed on public Wi-Fi.
   **Fixed by: Your web host**

2. **Repair the SPF record** — HIGH RISK
   Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.
   **Fixed by: Your email or DNS provider**

3. **Turn on DNSSEC** — HIGH RISK
   DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.
   **Fixed by: Your DNS host and domain registrar**

4 **Turn on HSTS** MEDIUM
On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
**Fixed by: Your web host**

5 **Require encrypted mail delivery (MTA-STS)** MEDIUM
Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.
**Fixed by: Your email or DNS provider**

6 **Turn on mail encryption reports (TLS-RPT)** MEDIUM
Nobody is told when encrypted mail delivery to the agency fails or is tampered with.
**Fixed by: Your DNS provider**

7 **Add framing protection** MEDIUM
The site can be hidden inside a hostile page to trick residents into clicking buttons they cannot see.
**Fixed by: Your web host**

8 **Publish a security contact (security.txt)** MEDIUM
People who find a security problem have no standard way to tell the agency before it is misused.
**Fixed by: Your web host**

## All results in detail

Every record and value we saw, grouped by area. Written for your IT team, readable by anyone.

### Website — 4 of 8 passed

**HTTPS certificate** PASS

| | |
|---|---|
| Issued by | **WE1** |
| Issued to | **iukams.com** |
| Expires | **December 7, 2026 (47 days after this check)** |
| TLS version | **TLSv1.3** |

**Redirect to HTTPS** MISSING

| | |
|---|---|
| HTTPS available | **Yes** |
| Plain address redirects to HTTPS | **No** |

**What this means:** Residents who type the plain address or follow an old link get an unencrypted page that can be read or changed on public Wi-Fi.
**How to fix:** Redirect every http:// request to https:// with a permanent (301) redirect. (Your web host)

**HSTS** MISSING

| | |
|---|---|
| HSTS header | **Not sent** |

**What this means:** On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
**How to fix:** Send the Strict-Transport-Security header with a max-age of at least one year. (Your web host)

### Certificate trust and match — PASS

| | |
|---|---|
| Trusted chain | Yes |
| Strong public key | Yes |
| Valid signature | Yes |
| Name matches domain | Yes |

### CAA record — PASS

| | |
|---|---|
| CAA record | Found |
| Authorities named | Not captured in this scan |

### Framing protection — MISSING

| | |
|---|---|
| X-Frame-Options | Not sent |

**What this means:** The site can be hidden inside a hostile page to trick residents into clicking buttons they cannot see.

**How to fix:** Send the header X-Frame-Options: SAMEORIGIN, or a Content-Security-Policy with frame-ancestors 'self'. (Your web host)

### File type protection — PASS

| | |
|---|---|
| X-Content-Type-Options | nosniff |

### Security contact (security.txt) — MISSING

| | |
|---|---|
| /.well-known/security.txt | Not found |

**What this means:** People who find a security problem have no standard way to tell the agency before it is misused.

**How to fix:** Publish /.well-known/security.txt with a contact address and an expiry date. (Your web host)

## Email — 2 of 5 passed

### SPF — NEEDS ATTENTION

| | |
|---|---|
| Record | `v=spf1 ip4:216.79.56.0/24 a:spf.ess.barracudanetworks.com ~all` |
| Ending | Soft fail (~all) |

**What this means:** Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.

**How to fix:** Publish one TXT record that lists every service sending mail for the domain and ends in -all. (Your email or DNS provider)

### DKIM — PASS

| | |
|---|---|
| Selectors found | mail |

### DMARC — PASS

| | |
|---|---|
| Policy | reject |
| Reports sent to | postmaster@iukams.com |
| Record | `v=DMARC1; p=reject; fo=0; rua=mailto:postmaster@iukams.com; ruf=mailto:postmaster@iukams.com` |

### MTA-STS — MISSING

| | |
|---|---|
| DNS record | Not found |
| Policy file | Not found |
| Enforced | No |

**What this means:** Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.

**How to fix:** Publish an _mta-sts TXT record and a policy file at mta-sts.(domain)/.well-known/mta-sts.txt. (Your email or DNS provider)

### TLS-RPT — MISSING

| | |
|---|---|
| TLS-RPT record | Not found |

**What this means:** Nobody is told when encrypted mail delivery to the agency fails or is tampered with.

**How to fix:** Publish a TXT record at _smtp._tls with an address to receive reports. (Your DNS provider)

## DNS and domain — 2 of 3 passed

### DNSSEC — MISSING

| | |
|---|---|
| Zone signed | No |
| Result | No DNSSEC records found. DNSSEC may not be enabled for this domain. |

**What this means:** DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.

**How to fix:** Turn on DNSSEC signing at the DNS host, then add the DS record at the registrar. (Your DNS host and domain registrar)

### IPv6 — PASS

| | |
|---|---|
| Website reachable over IPv6 | Yes |
| Website IPv6 addresses | 2606:4700:3030::6815:40c9, 2606:4700:3032::ac43:8834 |
| Name servers reachable over IPv6 | Yes |

### RPKI route protection — PASS

| | |
|---|---|
| Website route signed | Yes |
| Website route valid | Yes |
| Name server route valid | Yes |

### .gov domain — NOT SCORED

| | |
|---|---|
| Ends in .gov | No |

**What this means:** Anyone can register a look-alike .com or .org, so residents have no way to confirm this is the official site. Every .gov request is verified by CISA.

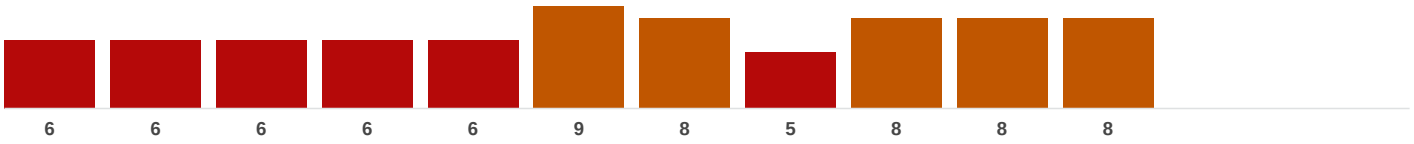

## Hosting and platform

Informational, not scored

| | |
|---|---|
| Website server | **104.21.64.201** |
| Mail server | **d177778b.ess.barracudanetworks.com** |
| Website server reputation | **Not on abuse lists** |
| Mail server blocklists | **Not listed** |
| WordPress | **Not detected** |
| Email addresses published on the site | **0** |
| Broken links found | **0** |
| Referrer policy header | **strict-origin-when-cross-origin** |

## Progress over time

Checks passed at each scan, oldest to newest. Highest possible is 16.

### If these basics were missed, what else has been missed?

These are published CISA standards that any IT department or provider can check in seconds. YesGov can fix all 8 in under 24 hours, re-run this check to prove it, and keep watching every day. The move to .gov takes 1 to 2 weeks because CISA verifies each request; security fixes on the current domain do not wait for it.

**yesgov.com/contact · (888) 777-0017 · info@yesgov.com**

## How we check

We only check settings that any computer on the internet can see: DNS records, certificates, web headers and mail policies. We never log in to, scan or probe any agency system. The 16 checks build on CISA Binding Operational Directive 18-01 and other published internet standards. Full method: yesgov.com/open-data#how-we-grade.

### Verify this report online

Scan the code or visit the address below to see these results, check the domain again and get alerts when anything changes.
