GOVERNMENT DOMAIN SECURITY REPORT

killinglyct.gov

Town of Killingly, Connecticut · Population 17,945

Checked September 22, 2026 at 5:03 AM UTC · Check ID be059e98-4a10-43cb-a027-a89b4fdb39ec

C

8 of 16 checks passed **Residents are exposed**

Basic protections recommended by CISA are missing. Each fix below is a standard setting, listed in order of risk to residents.

8 passed · 2 need attention · 6 missing

Website	Email	DNS and domain
5 of 8	1 of 5	2 of 3

What to fix first

In order of risk to residents. Each is a one-time setting that then needs to be watched.

1. **Turn DMARC enforcement on** — HIGH RISK
   A DMARC record exists but only monitors. Fake tax bills, utility shut-off notices and payment requests sent in the agency's name are still delivered.
   Fixed by: Your email or DNS provider

2. **Repair the SPF record** — HIGH RISK
   Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.
   Fixed by: Your email or DNS provider

3. **Turn on DNSSEC** — HIGH RISK
   DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.
   Fixed by: Your DNS host and domain registrar

4. **Turn on HSTS** — MEDIUM
   On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
   Fixed by: Your web host

5. **Require encrypted mail delivery (MTA-STS)** — MEDIUM
   Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.
   Fixed by: Your email or DNS provider

6 **Turn on mail encryption reports (TLS-RPT)** MEDIUM
Nobody is told when encrypted mail delivery to the agency fails or is tampered with.
Fixed by: Your DNS provider

7 **Add a CAA record** MEDIUM
Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.
Fixed by: Your DNS provider

8 **Publish a security contact (security.txt)** MEDIUM
People who find a security problem have no standard way to tell the agency before it is misused.
Fixed by: Your web host

All results in detail

Every record and value we saw, grouped by area. Written for your IT team, readable by anyone.

Website — 5 of 8 passed

HTTPS certificate PASS

Issued by	**WE1**
Issued to	**killinglyct.gov**
Expires	**December 9, 2026 (78 days after this check)**
TLS version	**TLSv1.3**

Redirect to HTTPS PASS

HTTPS available	**Yes**
Plain address redirects to HTTPS	**Yes**

HSTS MISSING

HSTS header	**Not sent**

What this means: On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
How to fix: Send the Strict-Transport-Security header with a max-age of at least one year. (Your web host)

Certificate trust and match PASS

Trusted chain	**Yes**
Strong public key	**Yes**
Valid signature	**Yes**
Name matches domain	**Yes**

CAA record — MISSING

CAA record	Not found

What this means: Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.

How to fix: Publish a CAA record naming the authority you use, for example 0 issue "letsencrypt.org". (Your DNS provider)

Framing protection — PASS

X-Frame-Options	SAMEORIGIN

File type protection — PASS

X-Content-Type-Options	nosniff

Security contact (security.txt) — MISSING

/.well-known/security.txt	Not found

What this means: People who find a security problem have no standard way to tell the agency before it is misused.

How to fix: Publish /.well-known/security.txt with a contact address and an expiry date. (Your web host)

Email — 1 of 5 passed

SPF — NEEDS ATTENTION

Record	`v=spf1 ip4:172.85.28.43 ip4:199.241.247.202 ip4:136.175.210.115 include:spf.protection.outlook.com include:spfa.cpmails.com ~all`
Ending	Soft fail (~all)

What this means: Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.

How to fix: Publish one TXT record that lists every service sending mail for the domain and ends in -all. (Your email or DNS provider)

DKIM — PASS

Selectors found	selector1, k2

DMARC — NEEDS ATTENTION

Policy	none (monitor only)
Record	`v=DMARC1; p=none;`

What this means: A DMARC record exists but only monitors. Fake tax bills, utility shut-off notices and payment requests sent in the agency's name are still delivered.

How to fix: After reviewing the reports, change p=none to p=quarantine, then to p=reject. (Your email or DNS provider)

MTA-STS — MISSING

DNS record	Not found
Policy file	Not found
Enforced	No

What this means: Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.

How to fix: Publish an _mta-sts TXT record and a policy file at mta-sts.(domain)/.well-known/mta-sts.txt. (Your email or DNS provider)

TLS-RPT — MISSING

TLS-RPT record	Not found

What this means: Nobody is told when encrypted mail delivery to the agency fails or is tampered with.
How to fix: Publish a TXT record at _smtp._tls with an address to receive reports. (Your DNS provider)

DNS and domain — 2 of 3 passed

DNSSEC — MISSING

Zone signed	No
Result	No DNSSEC records found. DNSSEC may not be enabled for this domain.

What this means: DNS answers are not signed. A forged answer can send residents to a fake payment page, or redirect the agency's email, with no visible sign.
How to fix: Turn on DNSSEC signing at the DNS host, then add the DS record at the registrar. (Your DNS host and domain registrar)

IPv6 — PASS

Website reachable over IPv6	Yes
Website IPv6 addresses	2606:4700:3037::ac43:84f2, 2606:4700:3032::6815:52a
Name servers reachable over IPv6	Yes

RPKI route protection — PASS

Website route signed	Yes
Website route valid	Yes
Name server route valid	Yes

.gov domain — PASS

Ends in .gov	Yes

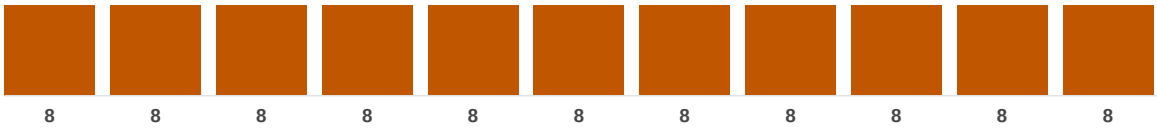

Hosting and platform

Informational, not scored

Website server	104.21.5.42
Mail server	killinglyct-gov.mail.protection.outlook.com
Website server reputation	Not on abuse lists
Mail server blocklists	Not listed
WordPress	Not detected
Email addresses published on the site	2
Broken links found	0
Referrer policy header	no-referrer-when-downgrade

Progress over time

Checks passed at each scan, oldest to newest. Highest possible is 16.

If these basics were missed, what else has been missed?

These are published CISA standards that any IT department or provider can check in seconds. YesGov can fix all 8 in under 24 hours, re-run this check to prove it, and keep watching every day.

yesgov.com/contact · (888) 777-0017 · info@yesgov.com

How we check

We only check settings that any computer on the internet can see: DNS records, certificates, web headers and mail policies. We never log in to, scan or probe any agency system. The 16 checks build on CISA Binding Operational Directive 18-01 and other published internet standards. Full method: yesgov.com/open-data#how-we-grade.

Verify this report online
