GOVERNMENT DOMAIN SECURITY REPORT

northplains.gov

City of North Plains, Oregon · Population 3,378

Checked June 30, 2026 at 3:59 AM UTC · Check ID 7b021585-2821-437a-83fb-61ec13394401

C+

9 of 16 checks passed **Needs attention**

The basics are in place, but several standard protections are missing. The list below is in order of risk to residents.

● 9 passed ● 1 needs attention ● 6 missing

Website	Email	DNS and domain
5 of 8	2 of 5	2 of 3

What to fix first

In order of risk to residents. Each is a one-time setting that then needs to be watched.

1. **Repair the SPF record** — HIGH RISK
   Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.
   Fixed by: Your email or DNS provider

2. **Turn on HSTS** — MEDIUM
   On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.
   Fixed by: Your web host

3. **Require encrypted mail delivery (MTA-STS)** — MEDIUM
   Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.
   Fixed by: Your email or DNS provider

4. **Turn on mail encryption reports (TLS-RPT)** — MEDIUM
   Nobody is told when encrypted mail delivery to the agency fails or is tampered with.
   Fixed by: Your DNS provider

5. **Add a CAA record** — MEDIUM
   Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.
   Fixed by: Your DNS provider

6 **Publish a security contact (security.txt)** MEDIUM

People who find a security problem have no standard way to tell the agency before it is misused.

Fixed by: Your web host

7 **Add IPv6 support** MEDIUM

Networks that only use IPv6, including some mobile carriers, cannot reach the site directly.

Fixed by: Your web host

All results in detail

Every record and value we saw, grouped by area. Written for your IT team, readable by anyone.

Website — 5 of 8 passed

HTTPS certificate — PASS

Issued by	**YR1**
Issued to	**ssl8.revizesites.com**
Expires	**September 3, 2026 (65 days after this check)**
TLS version	**TLSv1.3**

Redirect to HTTPS — PASS

HTTPS available	**Yes**
Plain address redirects to HTTPS	**Yes**

HSTS — MISSING

HSTS header	**Not sent**

What this means: On public Wi-Fi, a resident's visit can be pushed to an unencrypted copy of the site.

How to fix: Send the Strict-Transport-Security header with a max-age of at least one year. (Your web host)

Certificate trust and match — PASS

Trusted chain	**Yes**
Strong public key	**Yes**
Valid signature	**Yes**
Name matches domain	**Yes**

CAA record — MISSING

CAA record	**Not found**

What this means: Any certificate authority in the world may issue a certificate for this domain, which makes impersonating the site easier.

How to fix: Publish a CAA record naming the authority you use, for example 0 issue "letsencrypt.org". (Your DNS provider)

Framing protection — PASS

X-Frame-Options	**SAMEORIGIN**

File type protection — PASS

X-Content-Type-Options	nosniff

Security contact (security.txt) — MISSING

/.well-known/security.txt	Not found

What this means: People who find a security problem have no standard way to tell the agency before it is misused.

How to fix: Publish /.well-known/security.txt with a contact address and an expiry date. (Your web host)

Email — 2 of 5 passed

SPF — NEEDS ATTENTION

Record	`v=spf1 include:spf.protection.outlook.com ~all`
Ending	Soft fail (~all)

What this means: Receiving mail systems cannot tell the agency's real email from a forgery, so residents can receive fake notices in its name.

How to fix: Publish one TXT record that lists every service sending mail for the domain and ends in -all. (Your email or DNS provider)

DKIM — PASS

Selectors found	selector1, default, k2

DMARC — PASS

Policy	reject
Record	`v=DMARC1;p=reject;sp=reject;adkim=s;aspf=s;pct=100;fo=0;rf=afrf;ri=86400`

MTA-STS — MISSING

DNS record	Not found
Policy file	Not found
Enforced	No

What this means: Mail sent to agency staff can be forced onto an unencrypted connection and read in transit.

How to fix: Publish an _mta-sts TXT record and a policy file at mta-sts.(domain)/.well-known/mta-sts.txt. (Your email or DNS provider)

TLS-RPT — MISSING

TLS-RPT record	Not found

What this means: Nobody is told when encrypted mail delivery to the agency fails or is tampered with.

How to fix: Publish a TXT record at _smtp._tls with an address to receive reports. (Your DNS provider)

DNS and domain — 2 of 3 passed

DNSSEC PASS

Zone signed	Yes
Result	DNSKEY records found

IPv6 MISSING

Website reachable over IPv6	No
Name servers reachable over IPv6	No

What this means: Networks that only use IPv6, including some mobile carriers, cannot reach the site directly.
How to fix: Ask the host for an IPv6 address and publish an AAAA record for the site. (Your web host)

RPKI route protection PASS

Website route signed	Yes
Website route valid	Yes
Name server route valid	No

.gov domain PASS

Ends in .gov	Yes

Hosting and platform

Informational, not scored

Website server	75.2.20.73
Mail server	northplains-gov.mail.protection.outlook.com
Website server reputation	Not on abuse lists
Mail server blocklists	Not listed
WordPress	Not detected
Email addresses published on the site	3
Broken links found	19
Referrer policy header	no-referrer-when-downgrade

Progress over time

Checks passed at each scan, oldest to newest. Highest possible is 16.

If these basics were missed, what else has been missed?

These are published CISA standards that any IT department or provider can check in seconds. YesGov can fix all 7 in under 24 hours, re-run this check to prove it, and keep watching every day.

yesgov.com/contact · (888) 777-0017 · info@yesgov.com

How we check

We only check settings that any computer on the internet can see: DNS records, certificates, web headers and mail policies. We never log in to, scan or probe any agency system. The 16 checks build on CISA Binding Operational Directive 18-01 and other published internet standards. Full method: yesgov.com/open-data#how-we-grade.

Verify this report online

Scan the code or visit the address below to see these results, check the domain again and get alerts when anything changes.
